

Mohamed Ibrahim Issa

Backend Developer | ASP.NET Core | C# | SQL Server

Saudi Arabia (Remote) | mohmedissa365@gmail.com | GitHub: github.com/mohmedlq

Professional Summary

Backend Developer with hands-on experience building database-driven applications and RESTful APIs using ASP.NET Core, C#, SQL Server, ADO.NET, and Entity Framework Core. Strong foundation in Object-Oriented Programming (OOP), SOLID principles, data structures, algorithms, and layered architecture. Passionate about designing clean, scalable, and maintainable software solutions while expanding into Full Stack Web Development.

Technical Skills

Languages: C#, C++, JavaScript, HTML5, CSS3, SQL (T-SQL), TypeScript

Backend: ASP.NET Core, .NET, RESTful APIs, ADO.NET, EF

Databases: SQL Server, RDBMS, Stored Procedures, Triggers, Query Optimization

Concepts: OOP, SOLID Principles, N-Tier Architecture, Clean Code, Data Structures, Algorithms

Tools: Git, GitHub, Visual Studio, Visual Studio Code

Projects

Swift Reports

Developed the backend of a real-world school reporting platform using ASP.NET Core, RESTful APIs, SQL Server, and layered architecture. Designed scalable APIs and business logic for automated report generation.

Driving & Vehicle License Department (DVLD)

Built an enterprise-style desktop system for managing applicants, driving licenses, examinations, renewals, international licenses, and detained licenses using C#, SQL Server, ADO.NET, and 3-Tier Architecture.

Banking Management System

Developed a complete C++ banking application featuring employee and customer portals, deposits, withdrawals, transfers, authentication, and persistent file-based storage using Object-Oriented Programming.

Education

High School — Expected Graduation: 2027

Languages

Arabic (Native) • English (Professional Working Proficiency)
